Image Article

In the current image article, we present different high-resolution simulations of medical, medicinal, clinical, pharmaceutical and therapeutics oncology of human breast cancer translational Nano drugs delivery treatment process under synchrotron and X-Ray radiations (Figure 1) [1-84].

Furthermore, we have computationally simulated medical, medicinal, clinical, pharmaceutical and therapeutics oncology of human breast cancer translational Nano drugs delivery treatment process under synchrotron and X-Ray radiations (Figure 2) [1-84].
